

## Make The Switch To A Natural-Based Candle Wax

Looking for a non-petroleum wax extender or replacement for your candle business? South Chicago Packing offers a variety of non-petroleum wax alternatives. We offer hydrogenated animal fats and/or vegetable glycerides, which can be used as extenders to petroleum-based candles as well as naturally derived drop-in candle wax blends.

### Performance & Innovation

Our R&D teams will partner with you to develop the perfect candle wax blend to meet your specifications using our expertise in managing glass adhesion, bloom resistance, melting point ranges and clean burning formulations.

### Preference & Sustainability

Consumer preference of non-petroleum, natural waxes is on the rise and will continue to grow. To serve this trend, our R&D experts are committed to advancing the science of vegetable and animal-based natural waxes. We would be happy to consult with you to begin the sample review process!

#### Interested in learning more about South Chicago Packing?

South Chicago Packing is committed to educating our customers about culinary and industrial trends, the benefits of using natural animal fats and vegetable products in multiple applications, and the development of specific products and formulas to meet your needs. We are happy to share additional materials on these topics upon request.

Our business development team would be happy to partner with you to review operational challenges and create the best solution for your unique business requirements.

#### Why South Chicago Packing?

For more than 45 years, South Chicago Packing has been a leader in natural fats, oils, waxes, and coatings. We combine our industry expertise with science and innovation to develop formulations and products to meet the needs of our customers - no matter the application!

SCP is committed to continually improving and evolving our products and processes. Whether we are partnering with you to match an existing formula, or developing a customized blend, the team at South Chicago Packing is Driven to Serve™.
